SUPPORT CALLS

"I feel like I'm on holiday every day now. Obra runs my entire back-office with minimal input from me, nothing like when I used to handle everything on my own."

AL HOST · PILOT COHORT

Every booking in Portugal is a legal act. Most hosts find out what that means when they get fined.

- Every AL stay must be registered with SIBA (Portugal's national STR authority) before the guest arrives. Late or missing: fines.
- On top of that: arrival messages, check-in instructions, cleaning handovers, owner reports. Every booking, every time.
- Most AL hosts own 1–3 properties and run them alongside other work. Admin alone can take hours per booking.
- ~100,000 AL properties are registered in Portugal. The EU STR Regulation (2024) rolls the same compliance model across all 27 member states.

Obra handles the entire workflow. The host sets it up once.

16 reservations. End-to-end. No intervention.

16

COMPLETE WORKFLOWS

Booking email → SIBA → guest
comms → owner report. No manual
steps.

10

LIVE PILOTS

8 AL hosts · 1 accountant · 1 solicitor.
Free pre-launch cohort. First paid
conversions targeted Q3 2026.

1

MANAGEMENT AGENCY

One pilot runs multiple properties — a
different LTV conversation from
single-host users.

0

SUPPORT CALLS NEEDED

No pilot has needed intervention
beyond initial setup.

"I feel like I'm on holiday every day now. Obra runs my entire back-office with minimal input from me, nothing like when I used to handle everything on my own."

AL HOST · PILOT COHORT

SIBA is mandatory. That's the door in.

PORTUGAL · BEACHHEAD

~100k

Registered AL properties. Every one files SIBA or risks fines. Obra enters here.

- Property managers, accountants, and solicitors are already in the pilot cohort. Each manages multiple AL clients — distribution that required no sales effort.

EUROPE · EXPANSION

~5M

STR hosts across 27 EU member states. The EU STR Regulation (2024/1028) extends the same compliance requirement to all of them.

- Airbnb and property software assume the host handles compliance. Obra handles it. Obra trains on Portugal's SIBA before Spain, France, and Italy face the same mandate.

From €50/month. Agencies on custom.

STARTER · SINGLE HOST

€50_{/mo}

Single AL property. Full workflow automation — SIBA, guest comms, owner updates.

SCALE · PORTFOLIO

€150_{/mo}

Multiple properties. All connectors. Designed for the active investor or small portfolio manager.

AGENCY · CUSTOM

Custom

Management agencies running 10–30+ properties. Per-property or flat retainer. One contract covers the portfolio.

- COGS: Anthropic API usage. Scales with volume, not headcount.
- A part-time admin in Portugal costs €600–800/month. The comparison makes itself.
- €1M ARR: ~1,700 hosts at base rate, or fewer with agency contracts.
- Obra stores guest history, host preferences, and property profile. Switching cost is real.

€150k–250k

PRE-SEED · 2026

- Execute Portugal go-to-market — 10 paying hosts by Dec 2026, path to €50k MRR
- Deepen the product — expand the connector layer across compliance, booking, and property management
- Grow the team
- Own Portugal — take market share before EU expansion

CO-FOUNDER

Francisco Toscano

Building since 16. Prior exit in 2017, technology sector. Anthropic Certified Developer. Obra is his first vertical AI company.

CO-FOUNDER

Liliana

Property Manager at West Cliffs Resort. The operator perspective behind every product decision.

- Anthropic Claude for Business partner · Anthropic Certified Developer · Built on Claude
